**CURRENTS 2025 Art & Technology Festival Returns to Santa Fe
with a Symposium on Time in the Digital Age**

Santa Fe, NM — June 13-22, 2025 — Parallel Studios is thrilled to present the 16th edition of CURRENTS Art & Technology Festival, a showcase of the latest innovations in contemporary art and technology. Taking place at El Museo Cultural, this ten-day event will feature 72 works by 90 artists from around the world, exploring the evolving intersections of art, technology, and digital culture.

New to this year's festival is the two-day symposium, "Art & Technology in a Culture of Speed," which brings together artists, curators, and scholars whose work engages with time as a central theme. Through panel discussions, artist talks, and a tour of selected works in the festival, the symposium will explore how technological acceleration shapes artistic practice, perception, and experience. By examining works that engage with duration, slowness, immediacy, and digital time, the event provides a space for critical reflection on how we navigate temporality in a technology-driven world.

Held in Santa Fe, New Mexico, CURRENTS 2025 is uniquely situated within the Southwest's vibrant arts community, offering a distinctive environment for exploring the evolving relationship between technology and culture. Attendees can view a dynamic range of interactive installations, VR/AR/XR, AI + artist collaborations, robotics, kinetic and electro-mechanical objects, multimedia performances, digital sculptures, wearables, experimental video and animation.

About CURRENTS New Media

CURRENTS is an annual festival produced by Parallel Studios Inc., a 501(c)(3) nonprofit founded by Frank Ragano and Mariannah Amster. For over 23 years, it has been a leading platform for new media art, presenting innovative work at the intersection of art and technology. Showcasing artists from around the world, CURRENTS provides a space for experimentation, public engagement, and collaborations.
